As an active member of the computer science industry and academia, the Proposed Final Judgement is truly disturbing, and seems to offer no real punishment for a company that *has been found guilty*. The restrictions are vague, and the limitations are minimal (and easily worked around). Please see Dan Kegel's excellent synopsis of comments here <<http://www.kegel.com/remedy/letter.html>>.

Thank you for your time, and please bolster our faith in our judicial system by rejecting this PFJ in favor of one that actually punishes the guilty.
